

# Python Crash Course

# Python for Finance

- Before we get started, let's have a quick review of how to work with Python.
- Keep in mind this is not meant to be a complete comprehensive review of Python, instead it is meant to be a quick overview of how to use Python.

# Python for Finance

- We will be using the Jupyter Notebook environment for the majority of the course, but please feel free to use any IDE you prefer for Python!

# Python for Finance

- After this quick crash course you will have an exercise notebook with a few tasks for you to go through.
- After that we will go through the solutions notebook.

# Let's get started!

# Python Crash Course

# Python for Finance

- We will be covering the following topics
  - Fundamental Data Types
  - Comparison and Logical Operators
  - Control Flow Statements
